GENERAL RULES FOR STUDENTS (ACADEMIC YEAR 2026/2027)

1. Form of seminars and classes

- Oncogenetics for all groups will be held on-site. However, students are kindly asked to join Teams groups before starting the course (the links will be provided in due time). Teams will be used to communicate and provide additional materials.
- Introductory seminar and supplementary materials for all seminars and classes will be available on the e-learning platform: *https://e-learning.wum.edu.pl/en* (starting from October 21, 2026)
- Students are expected to log in and complete the tasks provided (including short tests) before the start of the course.

2. Attendance:

- Students are expected to attend and actively participate in all seminars and classes.
- In the event of a single absence, it is possible to make up the class with another group.
- Making up more than one class or changing student groups requires consultation with the course coordinator.
- Students are expected to come to the class on time. Being late for over 15 minutes counts as an absence.
- To provide a good learning environment for everyone, students are requested to turn off any electronic devices that might disturb the class.

3. Credit for oncogenetics:

- The final colloquium is scheduled for November 20, 2026, and the Exam Bureau will organize it in computer rooms at the Teaching Center. The test consists of 20 single-choice or multiple-choice questions. Duration: 25 minutes. The pass threshold is 60%. The second term of the colloquium is planned for November 27, 2026. All details regarding rooms and exact time will be provided in November.
- If a student fails to pass on two scheduled dates, a third attempt may be permitted, which may be oral or written (at the discretion of the Department Head), in accordance with the Medical University of Warsaw regulations on exams and course completion.
